2

OUTLOOK

With the solutions shown here, the danger of the pipe coil endings being slammed around is greatly reduced. Since 2018, four accidents with reeled PE-HD pipes have occurred at BG BAU member companies, one of which was fatal. In order to initiate the market penetration of this safety system when uncoiling PE-HD pipe coils from the pipe coil transport trailer, BG BAU has included both systems in its occupational safety premiums.

1. Uncoiling fixation

This adapter is hooked into the uncoiling cage from Bagela. Only the serial number of the uncoiling cage must be transmitted.

Order No. standard uncoiling cage 008.343.00

Order No. uncoiling cage wide 008.343.01

2. Separation fixing

without quick release coupling

Order No. 004.780.00

Mounting bracket MS 01 for mini excavator

Order No. 004.789.01

Mounting bracket MS 03 for mini excavator

Order No. 004.789.00
